

## Purpose/Goals/Objectives of Service Catalogue Management (SCM)

---

The **purpose** of SCM is to provide a **single source of consistent information on all of the agreed services**, and ensure that it is widely available to those who are approved to access it.

The **goal** of the SCM process is to ensure that a **Service Catalogue is produced and maintained** containing accurate information on all operational services and those being prepared to run operationally.

The **objective** of SCM is to **manage the information contained within the Service Catalogue and to ensure that it is accurate** and reflects the current details, status, interfaces and dependencies of all services that are being run or being prepared to run in the live environment.
